- ☐ Canada flag (English)
- ☐ Brazil flag (Portuguese)
- ☐ Mexico flag (Spanish)
- ☐ Argentina flag (Spanish)
- ☐ Colombia flag (Spanish)
- ☐ Quebec flag (French)

Language selector positioning tips

- Show floating language selector option is the easiest and suitable for most websites.
- Show in menu option is best for **Flags**, **Flags with language name**, **Flags with language code**, **Language names**, **Language codes** widget looks.
- You can use GTranslate Widget in any pre-defined widget locations.
- `[gtranslate]` shortcode can be used anywhere on your website.
- `[gt-link lang="en" label="English" widget_look="flags_name"]` shortcode can be used to render individual language links.
- Wrapper selector CSS can be used to render the language selector inside matching elements.

Paid version advantages

- Search engine indexing
- Search engine friendly (SEF) URLs
- Human level neural translations
- Edit translations manually
- [Automatic translation post-editing service and professional translations](#)
- Meta data translation (keywords, page description, etc...)
- URL slug translation
- Language hosting (custom domain like example.fr, example.es)
- Seamless updates
- Increased international traffic and AdSense revenue
- Works in China
- Priority Live Chat support
